## COMMERICAL PROJECT

This is one of the most important commercial project for us this year. The project got initiated at the last year end and completed mid of this year. It is located in USA with 1670 tons. This job involved lot of manual connection works and the

engineering team did a great job in coordination with detailing team. This gave a new exposure to our team members. Though there were difficulties initially we were able to finish the job 15day beforehand. We coordinated and communicated with client via teams. It is a remarkable job of this year.

# MISCELLANEOUS PROJECT

This commercial building is located in Utah, USA. Its total height is 100 feet, 70 feet and below 30 feet. Weight of the project 6,61,771 lbf with 266 feet x 219 feet, sq.ft: 58,254. We did the miscellaneous work for this project as it's a concrete structure. The scope of work is main structural steel (column, beam and brace) and miscellaneous steel which include patio access

gates and their fence, barbeque trellis, dog run fences and gates with architectural panels, steel stair, rails, monument stairs and ground level rails. This is the biggest miscellaneous job we have done so far. We are able to complete the project within the given time frame.

## CII CEO Summit - Salem

CII Salem zone organized the first edition of CEO Summit - 2022 at Pavai Institutions Namakkal. Our Director Mr Srinivasan Manicakam is the convenor of CII Salem. In this summit, We had over 10 CEOs who created an impact in startups, Healthcare, Family run businesses, Educational institutions, Manufacturing, and Technology took part and shared their views.

There were very interesting discussions on First Gen Entrepreneur, Family business carried over by next generations and their challenges. How we can overcome Global competition in manufacturing using our own resources which was an eye opener to many people who took part in it.

## CII - 5s meeting excellence training series

Our Team Leaders took part in 5s meeting excellence training series conducted by CII Salem held at Radisson Salem. This training series gave them an idea about implementation of 5s in our service sector and what would be the impact of it.

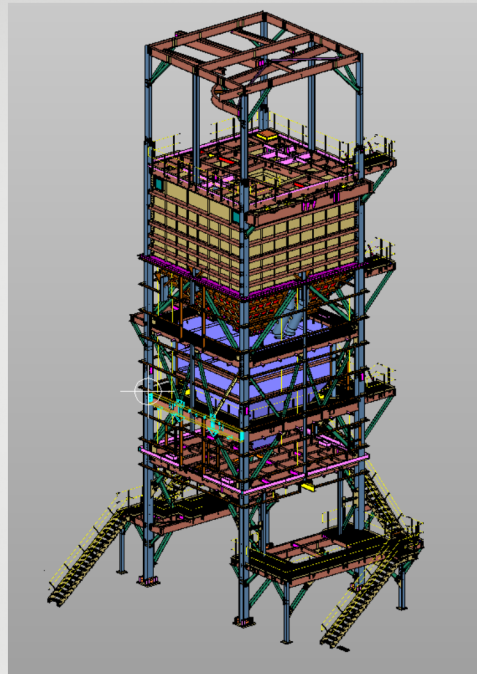

## Management Training - Focused Vision

In an organisation training to the employee is inevitable. We at Adept believes training and learning improves not only the employees personally but also for the growth of organisation. We arranged for management training so that the employee can clearly have the vision about the company and involve themselves in the mission of carrying it forward.

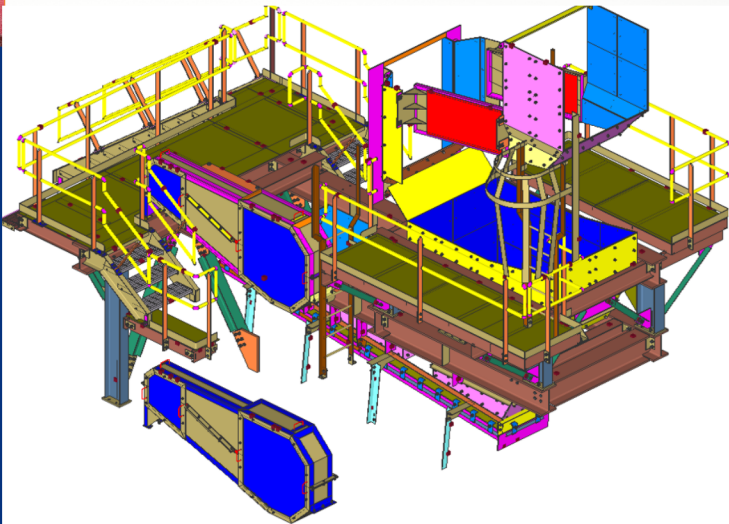

## PLATE WORK

This Train loadout project consist of a conveyer handling capacity of 4000TPH, surge bin with 300 tonnes and head chute detailed by us which

is located in WV, USA. This is the first time we are doing a plate work in SDS2 and we were able to complete it within the given time frame.

The next project is Primary crushing station is located in FL, USA. In this project the scope of work is Crushing station platform and its plateworks. Total ton of the project is 16 tonnes. When we started this project, everyone was working from Remote Locations (Work from Home) due to pandemic however we completed and delivered on time.

We are happy that both job are commissioned and we got appreciation from the clients.

## SPORTS DAY - ADEPT

Adept conducts sports day to engage its employees. This year 4 teams were formed and the match held on 27th Aug at Thotipatti, Namakkal.

Our employees had lots of fun in playing their favourite sport with their extended family. Always your body needs a restart from your routine and we at Adept understand that better. Especially playing your favourite sport with your colleague increases team bonding and acts as a stress buster.

**A team plays  
together - stays  
together**

## ADEPT HACKATHON

A hackathon gives you a glimpse into their technical and critical thinking skills. It is an excellent way to find qualified and talented employees.

At Adept we ignited the fire for new ideas and innovative works this year by introducing Adept Hackathon. In which, our employees can give a solution for already existing problem by

their technical competence. They can find a hack to save time, reduce the error and improve the detailing quality by which work efficiency will increase.

This year we conducted the hackathon and the people who won the prizes were rewarded with T-shirts and certificates.
